	Minority	54	25.2%	20.3%	<b>NO</b>	0

The Whole Person Rule was followed in declaring underutilization and establishing goals. When the actual employment of minorities or females is less than their availability and that difference is at least one whole person (1.0), then a goal is established. Add'l Needed (#) represents the number needed to eliminate the goal based on the chosen rule ( any difference, whole person, 80%, or statistical significance). This number is not a quota and should only be used to identify the magnitude of the disparity between incumbency and final availability.

	Minority	20	36.4%	28.3%	NO	0

The Whole Person Rule was followed in declaring underutilization and establishing goals. When the actual employment of minorities or females is less than their availability and that difference is at least one whole person (1.0), then a goal is established. Add'l Needed (#) represents the number needed to eliminate the goal based on the chosen rule ( any difference, whole person, 80%, or statistical significance). This number is not a quota and should only be used to identify the magnitude of the disparity between incumbency and final availability.
